If anyone from the public wishes to access the meeting, they can do so by calling the following conference line:
1-929-205-6099

Zoom Meeting ID: 838 3616 9923

Password: SEWER

All items within the meeting agenda are subject to deliberation and vote(s) by the Board of Sewer Commissioners.

6:00 P.M. Call Public Session to Order in Open Session

1. Public comment on non-agenda items: Public comments are allowed for up to a total of 12 minutes at the beginning of each meeting. Each speaker is limited to 3 minutes for comment. Based on past practice, members of the Board are not allowed to comment or respond.
2. Board of Sewer Commissioners Business
 - a. Sewer Abatement Request – 4 Bay Drive
 - b. Manhole ARPA project update & grease trap enforcement at 300 Main Street – Shawn Patterson, DPW Director
3. Minutes: none
4. Future agenda items
5. Town Administrator report
6. Committee reports
7. Correspondence
8. Next meeting date: April 25, 2023
9. Adjourn

TOWN CLERK BOURNE

2023 MAR 24 AM 11:31

RECEIVED

Attn Maria Simone

Dear Sewer Commission,

My name is Brenda Cruz and my husband (Derek Cruz) and my self bought my grandmothers small cottage located at 4 Bay Drive Buzzards, Bay in December of 2021... We took a few weeks to meet with contractors and the building inspector and decided early on we had an issue with the property being in the flood zone. We had decided to gut the inside and go for the proper license needed to complete the project. We are still in the beginning stages of going through the town to get approval for our future goals.. This is an ongoing project that needs to go before the zoning board and also the town we decided early on to shut the water off & winterize it and also turn the heat off and lock up the house. The house has been sitting there since January of 2022 empty with no heat or water and no-one being there except an engineer looking inside and outside and several contractors giving us bids. The bathroom is not able to be used and there is no kitchen presently inside the house. We did apply for a building permit but have not acted on doing anything yet since we are trying to raise the house and get it out of the flood zone. I am requesting a sewer bill abatement since we never even used anything to do with the sewer since January of 2022.. Your more then welcome to go look at the house and see that the kitchen is gone and no use to the bathroom.. The back door is open...

We were instructed to pay 1196.28 and see if we can get reimbursed (sewer abatement) which would not even cover what we paid in 2022 also. Please consider reimbursement for us.. This is an 80 year old house and we are in over our heads so any reimbursement would be greatly appreciated..

Thank you for your consideration

Brenda & Derek Cruz

Subject: RE: 4 Bay Drive - Water Shutoff Date

Hi, I have no order showing it to be off. They used 16,000 gallons in 2022; 15,000 from Jan-June and only 1,000 July-Dec. Hope this helps!

Subject: 4 Bay Drive - Water Shutoff Date

Hi Louise,

I spoke with the owners of 4 Bay Drive, and they informed me that they have had their water shut off for about a year. Could you please confirm this and, if possible, provide me with a date of shutoff? I believe they mentioned they are doing construction and are looking to request a sewer bill abatement.

Thank you,

Maria Simone

March 2, 2023

Via Email

Dear Members of the Select Board and Town Administrator McCollem,

In a story in the Cape Cod Times February 26, 2023, Keith Barber, president of the Pocasset Water Quality Coalition describes the inability of his family to shellfish for softshell clams. Degraded water quality in Hens Cove, mostly from septic systems and lawn fertilizers are continuing to degrade Cape Cod's shore and pond waters.

The article presents the most recent findings of the Association to Preserve Cape Cod that most embayments have unacceptable water quality. The statistics are frightening: 90% of the Cape's 48 embayments that were evaluated were found to unacceptable water quality. More than half of the evaluated ponds on Cape Cod failed water quality tests.

Failing water quality could be better addressed in the Bourne by hiring a Director of Clean Water reporting to the Town Administrator to provide a professional addressing day-to-day management of Bourne's water quality issues. A person who would be responsible for acting on Bourne's behalf to provide the Select Board, acting as Sewer Commissioners and the Town Administrator a fulltime member of the administration to monitor and execute Bourne's degrading water quality.

To pay for this position, I suggest the annual 3% tax now added to real estate taxes be reduced to accommodate additional resources for this position and to support the cost of implementing the design and construction of wastewater treatment infrastructure. I also support taking part of this 3% Tax and re-allocating it to our Wastewater projects. We can't continue to operate our limited sewerage services off the few residents, including many seniors. We need to develop a town wide tax to support a town wide issue, poor and degrading water quality.

The long-time use of a parttime Board of Sewer Commissioners who also work parttime as members of the Select Board must be supported with professionals who can work fulltime for the town of Bourne.

I hope you will add such a discussion to one of your future meetings. This is not the first time I have suggested such a diversion of tax money for wastewater, and other towns including Mashpee and Orleans have already accomplished this change. We currently have over \$1 Million dollars in our CPA funds, and amount that indicates an over taxation and underutilization of precious taxpayer dollars.

Sincerely,

Stephen F. Mealy
