

MBTA Links

Focus40 is the long-range investment plan to position the MBTA to meet the needs of the Greater Boston region in 2040. On March 18, 2019, the Massachusetts Department of Transportation (MassDOT) and the MBTA released a draft of the Focus40 Plan. The Focus40 Plan will serve as a comprehensive playbook guiding all capital planning initiatives at the MBTA. It will ensure that the MBTA will become the reliable, robust, and resilient transit system the region will require in the future.

PRIORITY PLACES To ensure that the MBTA can be proactive about meeting the needs of the region in an uncertain future, Focus40 is attempting to shift the conversation around system expansion . Instead of starting with expansion project ideas, Focus40 seeks to identify places that need and can support higher quality transit – Priority Places – and then develop projects to serve those places
