Attn: Ms. Cassie Hammond

Re: Response to Peer Review of the Transportation Impact Assessment (TIA)
Cape View Way Comprehensive Permit Project
Bourne, Massachusetts

Dear Chairman Beyer and Members of the Zoning Board of Appeals:

Vanasse & Associates, Inc. (VAI) is providing responses to the comments that were raised in the July 20, 2021 Peer Review memorandum prepared by Professional Services Corporation, PC (PSC) on behalf of the Zoning Board of Appeals (ZBA) in reference to the May 2021 *Transportation Impact Assessment* (the "May 2021 TIA") prepared by VAI in support of the proposed multifamily residential development to be located off Cape View Way in Bourne, Massachusetts (hereafter referred to as the "Project"). Listed below are the comments that were identified in the subject memorandum followed by our response on behalf of the Applicant.

STUDY METHODOLOGY

Comment: *In preparing the submitted Transportation Impact Assessment (TIA) Vanasse & Associates inc (VAi) consulted the Town of Bourne and utilized the MassDOT Transportation Impact Assessment (TIA) Guidelines. The TIA includes assessment of existing and future conditions and provision of recommendations for measures to mitigate traffic impacts. Intersection operations were evaluated using the procedures of the Highway Capacity Manual using in the Synchro® 11. Computer model. Overall, we find the methodology to be consistent with the MassDOT TIA Guidelines and standard engineering practice.*

Response: No response required.

TRANSPORTATION STUDY AREA

Comment: *The Transportation Study Area encompasses 3 intersections: the signalized Meetinghouse Lane/Route 3A/Canal Street Intersection, the unsignalized Meetinghouse Lane/Scusset Beach Road/Old Plymouth Road Intersection, and the unsignalized Meetinghouse Road/Cape View Way/54 Meetinghouse Lane Driveway Intersection which provides access to the Project Site. Given the magnitude of the traffic volumes generated by the Proposed Project, we consider the extent of the Transportation Study Area to be sufficient.*

2021 JUL 23 PM 3:24
TOWN CLERK BOURNE
RECEIVED

Ms. James Beyer, Chairman
Zoning Board of Appeals
Town of Bourne
July 22, 2021
Page 2 of 8

Response: No response required.

TRAFFIC VOLUMES

Comment: *VAI obtained automatic traffic recorder (ATR) counts, manual turning movement counts (TMCs), vehicle classification counts, and vehicle speed data on Tuesday April 27th and Wednesday April 28th, which properly represent midweek conditions.*

Response: No response required.

TRAFFIC VOLUME ADJUSTMENTS

Comment: *In order to account for the reduced 2021 traffic volumes resulting from the Massachusetts Safer at Home Order and the Phased Reopening Massachusetts Plan, the counted traffic volumes were increased by 23.8%. We consider this adjustment to be sufficient.*

Traffic volume counts for the proposed project were taken in the month of April which is a below average month of the year for traffic volumes. Accordingly, the VAI increased the counted traffic volumes by 1.9% to adjust to Average Season traffic volumes based upon analysis of traffic volume data from MassDOT Continuous Count Station Number 708 located on the Mid Cape Highway in Bourne.

Although the Proposed Project falls below the threshold where compliance is required, the requirements for transportation impact assessment set forth in the Cape Cod Commission's Technical Bulletin 96-003 provides valuable guidance on methodologies appropriate for preparing transportation impact assessments in Bourne.¹ Technical Bulletin 96-003 requires an analysis of Existing, No Build, and Build traffic volumes for both Average Season and Peak Season cases.

To initially indicate the magnitude of the required Peak Season adjustment, we reviewed Monthly Traffic Volume data for MassDOT Count Station 708 on the Mid Cape Highway in Bourne. For consistency with the VAI analysis, we used 2019 traffic volume data.

The Monthly Average Daily Traffic Volume for the month of July 2019 was 80,269 vehicles. The Monthly Average Daily Traffic Volume for the month of April 2019 was 60,491 vehicles. In order to evaluate Peak Season traffic, the counted traffic volumes should be increased by an additional 31.7% or such other factor as VAI may develop. See Table 1.

¹¹Cape Cod Commission, Technical Bulletin 96-003, Guidelines for Transportation Impact Assessment.

Ms. James Beyer, Chairman
Zoning Board of Appeals
Town of Bourne
July 22, 2021
Page 3 of 8

Table 1 Recommended Traffic Volume Adjustments

	Average Season	Peak Season
<i>Seasonal Adjustment</i>	1.9%	31.7%
<i>COVID-19 Adjustment</i>	23.8%	23.8%
<i>Counted Volume</i>	6,426	6,426
<i>Adjusted Volume</i>	8,110	10,480

We recommend that Peak Season traffic volumes be developed and intersection operations be evaluated for the Peak Season traffic volumes in addition to the Average Season traffic volumes provided in the submitted TIA.

Response: As requested by PSC, an evaluation of peak-season traffic volumes and traffic operations for the roadways and intersections that were assessed in the May 2021 TIA was completed following the methodology outlined by PSC.² Figure 3A depicts 2021 Existing peak-month (July), peak-hour traffic volumes, with Figure 4A depicting 2028 No-Build (without the Project) peak-month peak-hour traffic volumes and Figure 7A depicting the corresponding 2028 Build (with the Project) peak-month peak-hour traffic volumes.

OTHER EXISTING CONDITIONS

Comment: *We find the VAI analysis of other existing conditions is consistent with the MassDOT TIA Guidelines and standard engineering practice. A field inventory of pedestrian, bicycle, and public transportation facilities within the TSA was provided. Vehicle speed on Meetinghouse Lane was quantified from ATR data with 85th percentile speeds of 37 miles per hour eastbound and 36 miles per hour westbound. Vehicle crash rates were calculated for the three TSA intersections using data for the most recent 7-year period. The Meetinghouse Lane/Route 3A/Canal Street Intersection crash rate was below the State and District crash rates for signalized intersections and the Meetinghouse Road/Cape View Way/54 Meetinghouse Lane Driveway Intersection and Meetinghouse Lane/Scusset Beach Road/Old Plymouth Road Intersection crash rates were below the State and District crash rates for unsignalized intersections.*

Response: No response required.

FUTURE GROWTH AND NO-BUILD VOLUMES

Comment: *The VAI analysis of future growth and the 2028 No-Build Traffic Volumes is sufficient for an Average Season analysis but should be supplemented with a Peak Season analysis. VAI contacted the Town of Bourne and determined that there is no specific development by others that will impact the TSA. VAI evaluated traffic volume data from permanent counting stations located in Bourne and calculated an average traffic growth rate of 0.4%.*

²A slightly higher peak-season adjustment factor of 32.5 percent was used vs. 31.7 percent.

Ms. James Beyer, Chairman

Zoning Board of Appeals

Town of Bourne

July 22, 2021

Page 4 of 8

As a conservative analysis, VAI developed the 2028 No-Build traffic volumes using a 1% increase per year compounded annually for seven years as the background growth rate.

VAI contacted the town of Bourne and determined that there were no near-term roadway improvement projects impacting the TSA. Long term plans for replacement of the Sagamore bridge were noted.

Response: As described previously, Figure 7A depicts the 2028 No-Build (without the Project) peak-month peak-hour traffic volumes.

PROJECT GENERATED TRIPS

Comment: *The VAI trip generation calculations are consistent with the MassDOT TIA Guidelines and standard engineering practice. For the 51 unit multifamily residential development, trip generation was forecast using the trip generation rates for ITE Land Use Code 221 Multifamily Housing (Mid-Rise)³. The 51 residential units will generate 276 vehicle trips (138 entering 138 exiting) on a Weekday. The Project will generate 18 vehicle trips during the Weekday Morning Peak Hour (5 entering/13 exiting). The project will generate 23 vehicle trips during the Weekday Evening Peak Hour (14 entering/9 exiting).*

Response: No response required.

FUTURE BUILD TRAFFIC VOLUMES

Comment: *Trip distribution and assignment are consistent with the MassDOT TIA Guidelines and standard engineering practice. The trips generated by the Proposed Project were distributed and assigned to the roadway network in the TSA based upon analysis of US Census Journey to Work Data with the highest number of trips.(72% of entering trips/50% of exiting trips) assigned to the Scenic Highway west of the Meetinghouse Lane/Route 3A/Canal Street Intersection.*

Overall, the trips generated by the Proposed Project represent a relatively small addition to the existing traffic volumes in the TSA. Traffic volumes for the most heavily impacted roadway segment, the Scenic Highway west of the Meetinghouse Lane/Route 3A/ Canal Street Intersection increased by 7/10 of 1%.

Response: No response required.

³Institute of Transportation Engineers, Trip Generation Manual, Version 5.0 (Updates),10th Edition (September 2017)+Supplement (February 2020).

Zoning Board of Appeals
Town of Bourne
July 22, 2021
Page 5 of 8

INTERSECTION OPERATIONS

Comment: *The analysis of intersection operations is sufficient for an Average Season conditions but should be supplemented with an analysis of Peak Season conditions.*

The submitted Average Season analysis is based on the methodology of the Highway Capacity Manual utilizing Synchro® 11 software and is sufficient.

VAI determined that the signalized Meetinghouse Lane/Route 3A/Canal Street Intersection operates at LOS C Weekday Morning (2021 Existing, 2028 No-Build, and the 2028 Build) and at LOS C (2021 Existing) or LOS D (2028 No-Build and 2028 Build) Weekday Evening. Comparing operations with the 2028 No-Build vs the 2028 Build traffic volumes, there is no change in level-of-service, the increase in control delay is less than 1 second, and 95th percentile queue lengths remain unchanged or increase by a maximum of 1 vehicle.

VAI determined that the Old Plymouth Road northbound approach to the unsignalized Meetinghouse Lane/Scusset Beach Road/Old Plymouth Road Intersection operates at LOS C Weekday Morning (2021 Existing, 2028 No-Build, and 2028 Build) and at LOS C (2021 Existing) or LOS D (2028 No-Build and the 2028 Build) Weekday Evening. The Old Plymouth Road southbound approach operates at LOS B during both the Weekday Morning and Weekday Evening (2021 Existing, 2028 No-Build, and 2028 Build). Comparing operations with the 2028 No-Build traffic volumes vs the 2028 Build traffic volumes, there is no change in level-of-service or 95th percentile queue lengths on either approach.

VAI determined that the Cape View Way approach to the Meetinghouse Road/Cape View Way/54 Meetinghouse Lane Driveway Intersection operates at LOS B Weekday Morning and at LOS C Weekday Evening (2021 Existing, 2028 No-Build, and 2028 Build). Comparing operations with the 2028 No-Build traffic volumes vs the 2028 Build traffic volumes, there is no change in level-of-service and the 95th percentile queues are zero.

Response: As requested, an assessment of traffic operations (motorist delays, vehicle queuing and levels of service) at the study area intersections was completed under peak-month (July) traffic volume conditions, the results of which are summarized in Tables 9A and 10A.

As can be seen in Table 9A, under peak-month conditions, the signalized intersection of Meetinghouse Lane at Canal Street and State Road was shown to operate at LOS C/D during the weekday morning peak-hour (vs. LOS C under average-month conditions) and at LOS F (vs. LOS C/D) during the weekday evening peak-hour. The addition of Project-related traffic to the intersection under peak-month conditions did not result in a change in level-of-service for any movement over No-Build conditions, with Project-related impacts defined by a predicted increase in overall average motorist delay of up to 1.2 seconds and in vehicle queuing of up to one (1) vehicle.

Ms. James Beyer, Chairman
Zoning Board of Appeals
Town of Bourne
July 22, 2021
Page 6 of 8

With the exception of the Old Plymouth Road northbound approach during the weekday evening peak-hour at the Meetinghouse Lane/Old Plymouth Road intersection, all movements at the unsignalized study area intersections were shown to operate at LOS D or better during the peak hours under peak-month conditions. Independent of the Project, the Old Plymouth Road northbound approach to Meetinghouse Lane was shown to operate over its design capacity (i.e., LOS "F") during the weekday evening peak-hour under 2021 Existing peak-month conditions. Project-related impacts at the unsignalized study area intersections were defined as an increase in average motorist delay of up to 2.8 seconds and in vehicle queuing of up to one (1) vehicle.

SIGHT DISTANCE

Comment: *VAi correctly evaluated required Stopping Sight Distance (SSD) and desirable Intersection Sight Distance (ISD) using measured 85th percentile speed data obtained from Automatic Traffic Recorder (ATR) Counts. Measured SSD is greater than the required SSD on Meetinghouse Lane eastbound and westbound. Measured ISD is greater than the calculated ISD looking east and west from the Cape View Way approach.*

Response: No response required.

TIA RECOMMENDATIONS

Comment: *We concur with the VAi recommendations for project access including a 24-ft. pavement width, stop sign control at Meetinghouse Lane, signage, and a sidewalk.*

We also concur with the VAi recommendations for Transportation Demand Management (TDM), including designation of a transportation coordinator, posting public transportation service information, providing residents with a welcome packet that includes transportation information, constructing a sidewalk on Cape View Way, providing a central mailbox facility, and providing on site secure bicycle parking.

Response: No response required.

PEDESTRIAN AND BICYCLE ACCESS

Comment: *The site plan provides good pedestrian access with a walkway that connects the building entrance with the on-site parking areas and extends to meet the existing sidewalk on Meetinghouse Lane.*

The width of the proposed on-site walkway is not dimensioned but scales approximately 5 ft. Care must be taken not to place signposts, hydrants, and other obstructions that could restrict the accessible route. In two locations, the sidewalk is placed at the head of perpendicular parking spaces. Bumper overhang of 2 to 2½ feet can be accepted which would narrow the accessible route to an unacceptable 2½ to 3 ft. We recommend widening the sidewalk to 7½ ft. in these locations, providing parking bumper blocks, or providing a loam strip to maintain a minimum accessible route.

Ms. James Beyer, Chairman
Zoning Board of Appeals
Town of Bourne
July 22, 2021
Page 7 of 8

We concur with the VAI recommendation that secure indoor bicycle access be provided. Further, we recommend that an outdoor bicycle rack be provided for visitors.

- Response:** As requested by PSC, the Project proponent will review widening the sidewalk, providing parking bumper blocks, or including a loam strip to maintain a minimum accessible route. These accommodations will be shown on a subsequent revision of the Site Plans.

SITE ACCESS, CIRCULATION, AND PARKING

- Comment 1:** *There are 4 compact parking perpendicular parking spaces that are accessed from the pavement within the turnaround at the building entrance. The overall width of this parking bay is approximately 33 ft. (scaled) which will make accessing the parking space difficult. We recommend a minimum overall bay width of 42 ft. to ensure proper vehicle maneuvering.*

- Response:** As requested by PSC, the Project proponent will review the overall parking bay width and any adjustments will be reflected on a subsequent revision of the Site Plans.

- Comment 2:** *The turnaround with center island at the end of Cape View Way that has been adapted to serve as a drop-off at the building entrance has an outer diameter (scaled) of approximately 98 ft. and an inner diameter (scaled) of approximately 68 ft. The outer radius should be sufficient, but the inner radius should be reduced by widening the pavement in order to accommodate a fire truck or other large vehicles. An AASHTO S-BUS 40 design vehicle used by many fire departments to emulate their fire apparatus has a minimum outer turning diameter of approximately 85 ft. and a minimum inner turning diameter of approximately 50 ft. We recommend that a vehicle swept path plan be prepared to better define the required shape of the island. Consultation with the Fire Department is recommended to identify design vehicle requirements. In addition to accommodating fire apparatus, the size of the center island should be reduced as necessary in order to accommodate the largest non-emergency vehicle regularly using the turnaround.*

- Response:** A vehicle turning analysis will be prepared and provided by others under separate cover.

- Comment 3:** *Although the overall length of Cape View Way is only 650± ft., the potential to block emergency vehicle access is always a concern for a single entrance site. We recommend that signs be provided prohibiting parking along Cape View Way.*

- Response:** As requested by PSC, “No Parking” signs will be installed along Cape View Way. The signs will be reflected on a subsequent revision of the Site Plans.

- Comment 4:** *A total of 85 parking spaces (69 standard parking spaces/12 compact parking spaces/ 4 accessible parking spaces) are proposed to serve the 51 residences. We quantified peak parking demand based upon the Institute of Transportation Engineers (ITE) Parking Generation Manual⁴. For ITE Land Use 221 Multifamily Housing (Mid-Rise), peak period parking demand on a weekday in a general urban/suburban setting (no nearby rail transit)*

⁴⁴ITE Parking Generation Manual 5th Edition , January 2019, Institute of Transportation Engineers.

Ms. James Beyer, Chairman
Zoning Board of Appeals
Town of Bourne
July 22, 2021
Page 8 of 8

for 51 dwelling units is 60 parking spaces. The proposed 85 parking spaces should be sufficient. Although not anticipated, should additional parking ever be needed there are areas on-site where additional parking spaces could be added.

Response: No response required.

CONSTRUCTION MANAGEMENT PLAN

Comment: *A draft Construction Management Plan should be submitted that provides for minimization of overall construction phase vehicle trips including single occupant vehicle trips. Prior to construction, this draft plan can be refined through consultation with the Police Department and the Department of Public Works.*

Response: A draft Construction Traffic Management Plan (TMP) is attached and will be refined in consultation with the Police Department and the Department of Public Works as the Site Plans are advanced, and will include the use of police detail officers when appropriate and required by the Police Department.

We trust that this information is responsive to the comments that were provided by PSC concerning their review of the May 2021 TIA. If you should have any questions or would like to discuss our responses in more detail, please feel free to contact me.

Sincerely,

CONSTRUCTION MANAGEMENT PLAN

**CONSTRUCTION MANAGEMENT PLAN
MULTIFAMILY RESIDENTIAL DEVELOPMENT
CAPE VIEW WAY
BOURNE, MASSACHUSETTS**

The Project proponent will implement a Construction Management Plan (CMP) in coordination with Town of Bourne in order to facilitate the safe and efficient access to the Project site during construction activities. Summarized below are several measures which will be undertake during the construction phase of the Project.

- Prior to construction activities, a Temporary Traffic Control Plan (TTCP) will be submitted to the Department of Public Works (DPW) and the Police Department for review and approval. The TTCP will depict the location of the construction entrance, traffic and sediment control measures, traffic control devices and the location of any construction activities that will occur with the public right-of-way.
- A pre-construction meeting will be held with the DPW and the Police Department prior to the initiation of construction activities.
- The contact information for the general contractor or construction superintendent will be provided to the DPW and the Police Department.
- Hours of construction will be as defined by the Zoning By Laws of the Town or as established in the Comprehensive Permit Decision.
- Police details will be used when construction activities will occur that may disrupt travel along Meetinghouse Lane.
- Truck routes will be established that will avoid travel through residential areas and will be included in all construction contracts.
- Employees will be encouraged to car/vanpool in order to reduce construction-related traffic.
- Secure on-site storage will be provided for tools and equipment in an effort to minimize construction-related vehicle trips to the site.
- Full or partial street closures will be avoided to the extent possible. Should a partial street closure be necessary in order to off-load construction materials and/or complete construction-related activities, the closure will be limited to off-peak periods as defined by the DPW and the Police Department so as to minimize the impact of vehicular and pedestrian flow.
- Construction worker parking will be expressly prohibited along Meetinghouse Lane and the paved portion of Cape View Way. Construction contracts for the project will include notification of this prohibition.
